

# The Strongest, Most Durable Agriculture Film Available

As demands change, storage and feeding needs change. The BAG ALL Storage System is the solution and will provide you with the flexibility and quality you require in a silage storage system. BAG ALL is **cost efficient** and at the same time a premium high gauge, triple-layered coextruded, polyethylene bag.

The process of coextruding three polymer layers together, allows our films to achieve specific performance properties that are necessary to meet their application needs. Our films are put through a series of industry standard tests that measure the relative performance of each specific film in terms of strength and durability. Tests show that the Bag All bag consistently outperforms or is equal to our competition in all areas of standardized testing. Our bags have earned a reputation of quality by being more resistant to tears and punctures, and also by standing up firm and high.

## The Total Package

# Over 100 Years of Agricultural Experience

*Worldwide*

*Richburg, SC*

## Larger Layflat

for an easier fit  
and more bag  
to pack into!

## Standard Bag Sizes

7', 8', 9', 10'  
11' & 12'

## Standard Sheeting Widths

24', 32', 40'  
50', & 60'

## Premium Products

Available in  
Custom &  
Standard Sizes

Our experts have over 100 years of experience in the plastics manufacturing and agricultural services industry. Klerk's long running success comes from our ability to consistently distribute high performance, quality film, world wide.

Quality Management is important to us. All testing and research is conducted at Hyplast's sophisticated laboratory, located in Belgium. Regular testing is conducted in order to evaluate the physical properties that are associated with the performance features of each specific film. This analysis is valuable in predicting film performance under certain conditions in order to better optimize film performance.

Klerk's distributes films worldwide. Millions of pounds of inventory is stocked in our warehouse located in Richburg, South Carolina. To service our customers we ship through an extensive Dealer Network.

## Tri-Extruded

Blown triple-layer film for superior strength

## Ultraviolet Protection

Built in protection against the potentially harmful effects of UV radiation

White outside for maximum reflection and Black inside for maximum opacity

## Unique Blend of Virgin Resins

Superior tensile strength allows BAG ALL to hold shape better

Superior tear resistance when feeding out

Superior puncture properties allows for sufficiently tight packing with limited stretching

*Ordering is easy, just call Customer Service at 1-888-255-3757 or contact your local Klerk's Dealer*
